You are hereby notified that all real property in Kerr County falls under the jurisdiction of the Headwaters Groundwater Conservation District (HGCD). The Headwaters Groundwater Conservation District is part of the Hill Country Priority Groundwater Management Area and was created by House Bill No. 1463, Chapter 693, Acts of the 72nd Texas Legislature in January 1991. The District was organized to protect the underground water resources of Kerr County. It registers and permits wells drilled in the county and investigates the aquifers to determine appropriate plans for future development.

The Headwaters Groundwater Conservation District (HGCD) mission is to develop, promote, and implement water conservation, augmentation, and management strategies to protect the water resources of the District as a sustainable resource for the benefit of its citizens, economy, and environment.

The creation of groundwater conservation districts is authorized by state law (Texas Water Code, Chapter 36) and such districts are empowered and charged to conserve, preserve, protect, recharge, and prevent waste of groundwater resources within their boundaries. Groundwater conservation districts are the state's preferred method of groundwater management
